

Model 1667 Heavy Duty Single Point Load Cells

Features

- parallel bending beam
- heavy duty
- capacity: 50, ..., 2000 kg
- accuracy: 0.02 %fs; option: OIML C3
- max. platform size: 1200 X 1200 mm
- aluminum construction with surface anodized
- environment protection class: IP 65

Applications

- counting scales
- hopper scales
- overhead track scales

suggested platform size:

50~200kg:	600 mm x 600 mm
250~500kg:	600 mm x 800 mm
750~2000kg:	1200 mm x 1200 mm

Description

The "single point" load cells are made of parallel bending beam working principle. Only one unit is sufficient to build up a scale. These load cells are moment insensitive. That is, when installed in a platform scale, it reads the same regardless of the position of the load applied to the upper platform.

Model 1667 load cells are designed to this "single point" type and are manufactured from high quality aluminum alloy of aviation standard. 1667 load cells can be used to measure loads ranging from 50 kg to 2000 kg with the measuring accuracy of 0.02%fs (fs = full scale). On request, 1667 load cells can be supplied with OIML C3 certificate.

1667 load cells are widely used to manufacture hopper scales, track scales and counting scales.
