MC5

All you need for field calibration.

ACCURACY GUARANTEED

MC-calibrators come with a traceable, accredited calibration certificate.

Intrinsically safe MC5-IS

212.156 mbar

210.24 mbar

MC5 Multifunction Calibrator
– all you need for field calibration.

Accuracy meets versatility. You won't find this calibrator collecting dust on the shelf in your workshop; it is always on the go. Beamex's MC5 is the all-in-one documenting multifunction calibrator for calibrating pressure, temperature, electrical and frequency signals. The modular construction of the MC5 provides flexibility for user-specific requirements. For example, the MC5 can be ordered as a pressure or temperature stand-alone calibrator, and then later be expanded into a datalogging, versatile multifunction calibrator.

The MC5 is made for tough use. The robust IP65-rated casing, along with integrated impact protectors, makes MC5 an ideal calibrator for use in wet and dusty environments subject to wide temperature variations.

When accuracy, versatility and robustness are what you are looking for, MC5 is the solution.

Intrinsically safe MC5-IS
– made for extreme environments.

The ATEX certified MC5-IS is designed for use in potentially explosive environments, such as offshore platforms, oil refineries, chemical and petrochemical plants where inflammable gases may be present. There is probably no other intrinsically safe calibrator that can outperform the MC5-IS in terms of functionality. The MC5-IS is a documenting, multifunction calibrator that has calibration capabilities for pressure, temperature, electrical and frequency signals. Its modular design allows configuration based on your specific needs.

MC5 and MC5-IS

MC5 Multifunction Calibrator

MC5-IS Intrinsically Safe Multifunction Calibrator

MC5 Features

MC5 Main Features
Accurate, all-in-one calibrator – calibration capabilities for pressure, temperature, electrical and frequency signals
Documenting – communicates perfectly with calibration software
Field compatible, IP65-rated dust and waterproof casing
Modular design allows configuration based on your needs
Internal and/or external pressure modules
HART® communication
Foundation Fieldbus H1 or Profibus PA communication

MC5-IS Features

MC5-IS Main Features
Designed for use in potentially explosive environments
ATEX certified (EEx ia IIC T4 and ATEX directive II 1 G)
Calibration capabilities for pressure, temperature, electrical and frequency signals
Documenting – communicates perfectly with calibration software
Modular design allows configuration based on your needs
HART® Communication

Common Features of the MC5 and MC5-IS

Functions	Optional features
Internal pressure modules	Communication with software
External pressure modules	HART® communication
RTD measurement / simulation	Multichannel datalogging
Resistance measurement / simulation	Pressure controller communication *)
TC measurement / simulation	Temperature dry-block communication *)
Current measurement / generation	Foundation Fieldbus H1 or Profibus PA communication *)
Voltage measurement / generation	
Low voltage measurement / generation	*) Excluding MC5-IS
Frequency measurement / generation	
Pulse counting / generation	
Switch testing	
PRT sensor customization functionality	

beamex

Features of MC5
Accuracy guaranteed.

The MC5 is among the most accurate process calibrators available. As proof of this, each MC5 calibrator is delivered with a traceable, accredited calibration certificate.

The MC5 is made for tough use.

The IP65-rated robust casing, along with integrated impact protectors, makes MC5 an ideal calibrator for use in wet and dusty environments subject to wide temperature variations.

Modularity means versatility.

The MC5 is an extremely versatile calibrator with many different functions. The modular construction of MC5 provides flexibility for the user. For instance, the MC5 can be ordered as a pressure or temperature stand-alone calibrator, and then later expand it into a data-logging, documenting multifunction calibrator.

Communication with calibration software.

Using the MC5 together with calibration software provides you with a complete documenting calibration system that produces calibration certificates automatically. The benefits of the system include automated calibration procedures and paperless calibration management.

Make it safe with MC5-IS.

The MC5-IS is the intrinsically safe, ATEX certified (EEx ia IIC T4 and ATEX directive II 1 G) version of the MC5 Multifunction Calibrator. It is designed for use in potentially explosive environments, such as offshore platforms, oil refineries, chemical and petrochemical plants where inflammable gases may be present.

The world's first fieldbus calibrator.

Fieldbus installations are growing rapidly worldwide. Beamex is the first company in the world to answer to this demand: we have introduced the MC5 Fieldbus Calibrator, which can be used for calibrating Foundation Fieldbus H1 or Profibus PA transmitters. The MC5 Fieldbus Calibrator is a compact, easy-to-use and field compatible calibration solution that offers a lot of functionality.

General Specifications

MC5 / MC5-IS General Specifications

General	
Display	96 x 72 mm (3.78" x 2.83"), 320 x 240 pixels, back lit [1] LCD
Weight	1.7 - 2.3 kg (3.7 - 5.1 lbs)
Dimensions	245 mm (9.6") x 192 mm (7.5") x 74 mm (2.9") (d/w/h)
Case protection	IP65 (dust and water proof)
Keyboard	Membrane protected individual keys
Battery type	MC5; Rechargeable NiMH, 4000 mAh, 7.2V DC MC5-IS; Rechargeable NiMH, 1200 mAh, 8.4V DC
Battery operation	MC5; Average 10 hours MC5-IS; Average 5 hours
Charger supply	100...240 VAC, 50-60 Hz
Operating temperature	-10...50°C (14...122°F)
Storage temperature	-20 to 60°C (-4 to 140°F)
Humidity	0 to 80 % R.H. non-condensing
Measurement sample rate	2.5 / second
Warranty	Standard: 3 years for MC5; 1 year for battery pack. The warranty of the MC5 will be extended up to 6 years if the product is calibrated on a yearly basis at Beamex's Calibration Laboratory.

Temperature coefficient   ±0.001 % Rdg/°C outside 15 … 35°C (59 … 95 °F)
                              INT10mD / INT10mD-IS / EXT10mD / EXT10mD-IS < ±0.002 % Span/°C outside 15 … 35°C (59 … 95°F)

1)   The MC5 / MC5-IS Calibrators can hold three internal pressure modules.
2)   Every internal/external pressure module's range may also be displayed in absolute pressure if the Barometric Module (B) is installed.
3)   'Accuracy' includes hysteresis, nonlinearity, repeatability and reference standard uncertainty (k=2).
4)   '1 Year Uncertainty' includes hysteresis, nonlinearity, repeatability and typical long-term stability for mentioned period (k=2).
All external pressure modules (EXT) are also compatible with Beamex MC2 and MC5P Calibrators.

Supports the following pressure units as standard:
Pa, hPa, kPa, MPa, mbar, bar, lbf/ft2, psi, gf/cm2, kgf/cm2, kgf/m2, kp/cm2, at, mmH2O, cmH2O, mH2O, iwc, ftH2O, mmHg, cmHg, mHg, inHg, mmHg(0°C), inHg(0°C), mmH2O(4°C), inH2O(4°C), ftH2O(4°C), inH2O(60°F), mmH2O(68°F), inH2O(68°F), ftH2O(68°F), torr, atm.

INT B / EXT B; M5 (10/32") female.
INT10mD and EXT10mD; Two M5 (10/32") female threads with a hose nipple included.
INT100m/EXT100m – INT20C/EXT20C; G1/8" (ISO228/1) female. A conical 1/8" BSP male with 60° internal cone adapter included for Beamex hose set.
INT60, INT100, INT160; G1/8" (ISO228/1) female. EXT60, EXT100, EXT160, EXT250, EXT600, EXT1000; G ¼" (ISO228/1) male.
Wetted parts AISI316 stainless steel, Hastelloy, Nitrile rubber.

Maximum overpressure;
B module; 1200 mbar abs. 10mD module; 200 mbar. EXT600; 900 bar. EXT1000; 1000 bar.
For all other modules, the maximum overpressure is twice the nominal range.

MC5 and MC5-IS

Electrical Module (E)

Model	Function	Range	Resolution	1 Year Uncertainty[1] (±)
MC5	mV measurement[2]	±1000 mV	0.001 - 0.01 mV	0.02 % RDG + 5 µV
MC5-IS	mV measurement[2]	±250 mV	0.001 mV	0.02 % RDG + 5 µV
MC5	V measurement[3]	±50 V	0.00001 - 0.001 V	0.02 % RDG + 0.25 mV
MC5-IS	V measurement[3]	±30 V	0.00001 - 0.001 V	0.02 % RDG + 0.25 mV
MC5 & MC5-IS	mA measurement[4]	±100 mA	0.0001 - 0.001 mA	0.02 % RDG + 1.5 µA
MC5 & MC5-IS	Hz measurement[5]	0.0028 to 50000 Hz	0.000001 - 0.1 Hz	0.01 % RDG
MC5 & MC5-IS	Pulse counting[5]	0 to 9 999 999 pulses	1 pulse	N/A
MC5	mA generation[6]	0 to 25 mA	0.0001 mA	0.02 % RDG + 1.5 µA
MC5-IS	mA Sink	0 to 25 mA	0.0001 mA	0.02 % RDG + 1.5 µA

Temperature coefficient   < ±0.001% RDG / °C outside of 15...35°C (59...95°F)

1) Uncertainty includes reference standard uncertainty, hysteresis, nonlinearity, repeatability and typical long-term stability for mentioned period (k=2).
2) Bias current <10 nA
3) Impedance >1 MΩ
4) Impedance < 7.5 Ω
5) MC5; Impedance > 1 MΩ. Frequency measurement minimum amplitude 0.5 Vpp (< 5 kHz),
    1 Vpp (5...50 kHz). Pulse counting minimum amplitude 0.5 Vpp (pulse length > 100 µs),
    1 Vpp (pulse length 100 µs...10 µs).
    Trigger level range -1…+15 V.
5) MC5-IS; Impedance > 1 MΩ. Frequency measurement minimum amplitude 1 Vpp (< 10 kHz),
    3 Vpp (10...50 kHz). Pulse counting minimum amplitude 1 Vpp (pulse length > 50 µs),
    3 Vpp (pulse length 50 µs...10 µs).
    Trigger level range -1…+15 V.
6) Maximum load impedance 800 Ω

RTD Measurement and Simulation

Function	Range (°C)	Range (°C)	Measurement 1 Year Uncertainty[1] (±)	Simulation 1 Year Uncertainty[1] (±)
Pt-sensors	-200 to 850°C	-200 to 0°C	0.06°C	0.1°C
		0 to 850°C	0.025% RDG + 0.06°C	0.025% RDG + 0.1°C

1) Uncertainty includes reference standard uncertainty, hysteresis, nonlinearity, repeatability and typical long-term stability for mentioned period (k=2).

RTD types available as standard:				
Pt50 (385)	Pt400 (385)	Pt100 (3923)	Pt100 (3926)	Cu10 (427)
Pt100 (385)	Pt500 (385)	Pt100 (391)	Ni100 (618)	
Pt200 (385)	Pt1000 (385)	Pt100 (375)	Ni120 (672)	

To improve uncertainty with PRT (platinum RTD) sensors, the MC5 / MC5-IS includes a standard possibility that allows you to create customized PRT sensors using the Callendar van Dusen correction coefficients. The easy-to-use *Beamex PRT Tool* PC software is used to create the sensor and to send it to the MC5. Up to 100 customized PRT sensors can be stored in MC5 at one time.

This function may be also used to create new, non-supported PRT sensors in the MC5. Both measurement and simulation can be done with the customized sensors.

MC5 and MC5-IS

MC5 Temperature Electrical Module (ET)

Function	Range	Resolution	1 Year Uncertainty[1] (±)
mV generation[2]	±500 mV	0.001 - 0.01 mV	0.02 % RDG + 4 µV
V generation[3]	±12 V	0.00001 - 0.0001 V	0.02 % RDG + 0.1 mV
mA generation[4]	±25 mA	0.0001 mA	0.02 % RDG + 1 µA
Hz generation[5]	0.00028 to 50 000 Hz	0.000001 - 0.1 Hz	0.01 % RDG
Pulse generation[6]	0 to 9 999 999 pulses	1 puls	N/A
Ohm simulation[7]	1 to 4000 Ω	0.01 - 0.1 Ω	0.04 % RDG or 30 mΩ[8]
Ohm measurement[9]	0 to 4000 Ω	0.001 - 0.1 Ω	0.02 % RDG + 3.5 mΩ
mV measurement[10]	±500 mV	0.001 - 0.01 mV	0.02 % RDG + 4 µV

Temperature coefficient   < ±0.001% RDG / °C outside of 15...35°C (59...95°F)

1) Uncertainty includes reference standard uncertainty, hysteresis, nonlinearity, repeatability and typical long-term stability for mentioned period. (k=2)
2) Load effect < 5 µV/mA. Maximum output current 5 mA.
3) Load effect < 100 µV/mA. Maximum output current 10 mA (0 … 10 V), 3 mA (10 … 12 V).
4) Maximum load impedance 400 Ω.
5) Amplitude range 0 … 12 Vpp. Amplitude setting accuracy up to 5 kHz ±(200 mV + 5% of set value).
   Waveforms: Square wave (positive / symmetric) and sinewave (above 40 Hz).
6) Pulse generation frequency range 0.1 ... 1000 Hz. Amplitude setting 0 ... 12 Vpp.
7) Valid with measurement current 0.2 ... 5 mA (1 ... 1000 Ω), 0.1 .. 1mA (1 ... 4 kΩ). Ω/RTD simulation speed 1 ms.
8) Whichever is greater.
9) Specification valid with 4 wire connection. In 3 wire connection add 10 mΩ.
10) Bias current < 10 nA.

MC5-IS Temperature Electrical Module (ET)

MC5 Fieldbus Calibrator

MC5 Fieldbus Calibrator

The MC5 Fieldbus Calibrator is a combination of a multifunction calibrator and a fieldbus configurator. The MC5 is a compact, easy-to-use and field compatible calibration solution that offers a lot of functionality. The fieldbus functionality of MC5 includes reading the digital output of the fieldbus transmitter, changing the configurations of transmitters and transmitter trimming. Calibrating fieldbus transmitters with the MC5 requires only one person and the calibration results are automatically documented.

Main Features
Calibrate Foundation Fieldbus H1 or Profibus PA transmitters with the MC5
The MC5 is a calibrator and a fieldbus configurator in one unit
The MC5 makes traceable calibrations
Calibrations can also be performed when the fieldbus is not yet functioning
Calibration results are automatically documented in the MC5
The MC5 is a compact, easy-to-use and field compatible calibration solution
The MC5 Fieldbus Calibrator can be used for various other calibrations as well

With the MC5 Fieldbus Calibrator, you can:
Calibrate fieldbus transmitters (simultaneously measure/ generate input and read the digital output)
Change transmitter configurations
Perform transmitter trimming

Calibration Software

CMX Calibration Management Software

CMX is calibration management software that assists in documenting, planning, analyzing and, finally, optimizing calibration work. CMX's scalable technology and user configuration allows you to integrate it easily into other systems for a one-of-kind calibration system that fits your specific needs completely.

CMX also helps to meet the regulatory requirements, whether your plant's calibration system needs to comply with ISO 17025, cGMP or 21 CFR Part 11. By using CMX, you will have all your calibration results in a traceable and auditable form, either printed on paper or stored in electronic format in a database.

Professional Services

Re-calibration and Service

There are many benefits from using the services provided by Beamex's Accredited Calibration Laboratory on a regular basis. It ensures that the calibration equipment remains in excellent condition and you are also able to provide, if needed, up-to-date proof of the calibrator's measurement accuracy.

Training and Installation

Beamex provides worldwide services for installation and training. This way you are able to have your new calibration system up and running in no time. You also learn about the capabilities of Beamex calibration equipment, how to use it and how your organization will benefit the most from it.

Accessories

PG-Series of Calibration Pumps

The PG series includes hand-held, lightweight pressure and vacuum sources for field use. The PG series of hand pumps are ideal pressure/vacuum generators to be used as accessories for pressure and vacuum calibration.

External Pressure Modules

The external pressure modules introduce new configuration possibilities and add flexibility, as it is possible to calibrate even more pressure ranges with the same calibrator. This way, the Beamex calibration equipment meets your needs even better.
